

Log exposure: region x year specification

Program FE, Broad-field x year FE, and region x year FE; 2011 omitted

Enrollment-exposure elasticity relative to 2011

Positive enrollment and exposure only; samples differ by exposure measure.
95% confidence intervals; standard errors clustered by pre-treatment market.
Joint pretrend p-values: Total = 0.009; Triangular = 0.039; Gaussian = 0.000.
